Services Pricing Guide

Whether you're new to aesthetic treatment or coming back for a touch-up, it can be challenging to decide which of our treatment options is suitable for you and for your wallet. Our experienced providers at Swan Aesthetics have put this guide together to give you an idea of what we offer, who each treatment is best suited for, and what you can expect to pay.

Services Our Treatments

Neuromodulator

Neuromodulators are injectable treatments containing active ingredients that interrupt communication between nerves and targeted muscles. This interruption leads to decreased muscle contraction, resulting in a smoothing effect on the skin.

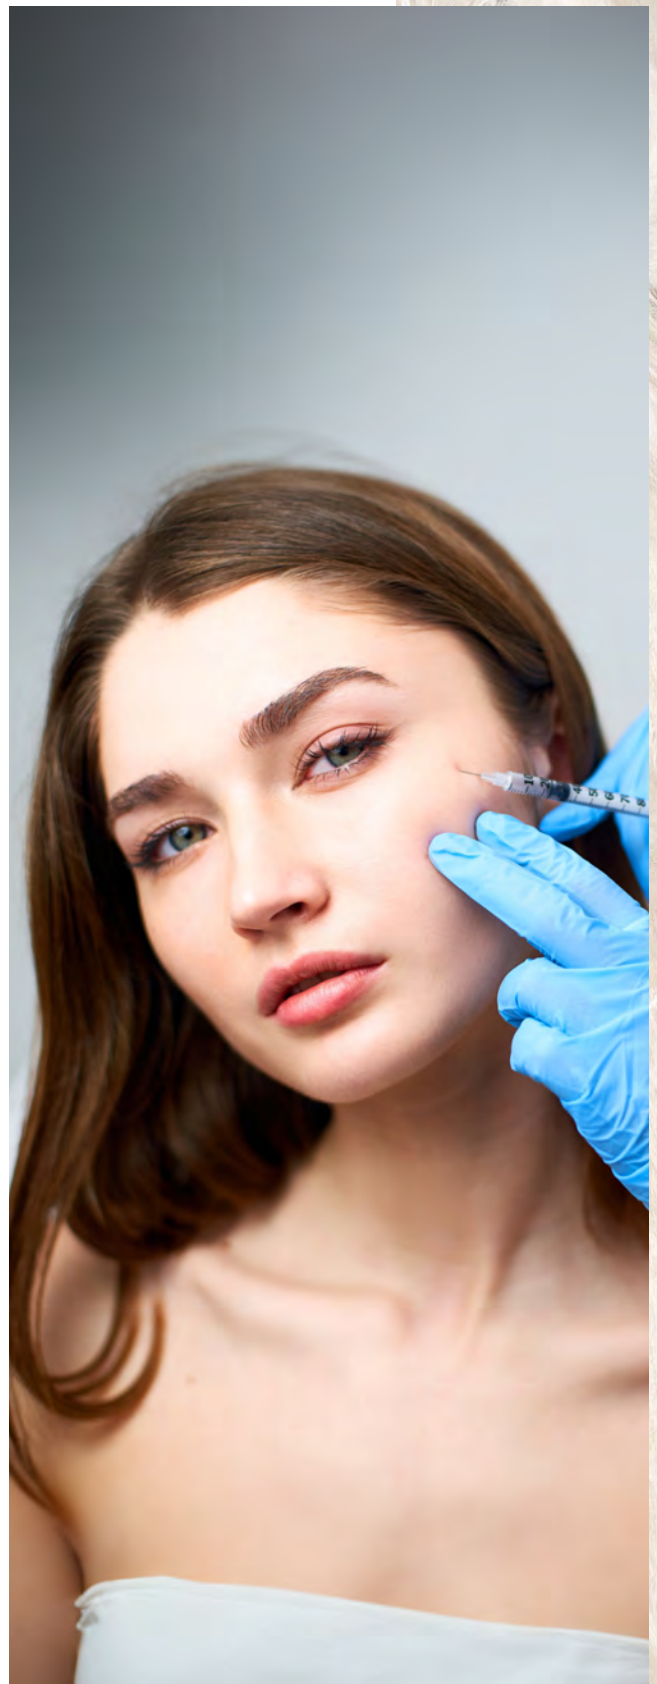

Neuromodulators are an effective treatment for preventing wrinkles and reducing the visibility of wrinkles and fine lines, especially those caused by repetitive muscle movements such as frowning, smiling, squinting, or laughing.

BOTOX AND DYSPORT

Botox and Dysport provide a subtle reduction in frown lines, crow's feet, and forehead lines while also effectively smoothing out lines above the lips, tiny wrinkles around the sides of the nose, and dimpling on the chin. Additionally, they can contour the jawline and alleviate issues related to jaw pain and clenching.

They are priced as low as \$13/unit. Repeat treatments are required to maintain your results, and you may need more than one unit for treatment depending on the depth of your lines and your desired treatment outcomes.

\$13/UNIT

Dermal Fillers

Dermal fillers are non-invasive treatments designed to replenish fullness in the hands and face. They can also augment the jawline, define facial features, and add volume. They are made of hyaluronic acid, a compound found naturally in the body. Hyaluronic acid, or HA, attracts water. When you get an HA filler, you instantly receive a hydrated, plump glow.

Fillers are effective in smoothing wrinkles and fine lines, restoring volume, and contouring. They are generally suitable for most people and can be easily combined with other aesthetic treatments.

JUVEDERM

Juvederm fillers utilize hyaluronic acid to enhance volume in seven distinct facial areas. Hyaluronic acid, naturally present in the body, attracts water molecules, providing hydration and firmness when injected into the skin. This helps the skin retain moisture and gives the appearance of fullness.

Juvederm Ultra

Juvederm Ultra is used in and around the lips, giving the appearance of more fullness.

Juvederm Ultra Plus

This FDA-approved filler addresses moderate to severe fine lines and wrinkles around the mouth and nose.

Juvederm Volbella

This filler augments lip fullness and corrects fine lines around the mouth, known as lipstick lines.

Juvederm Vollure

Vollure smooths moderate to severe facial wrinkles, targeting marionette and nasolabial lines, which run from the corner of the mouth to the edge of the chin and the edge of the nose to the corners of the mouth.

Juvederm Voluma

Juvederm Voluma restores cheek fullness and defines the chin for a sharper jawline contour, creating more overall definition and balance in the face.

Juvederm Volux

The Volux filler improves jawline definition for people who have lost volume in this area. Strategic injections can redefine facial contours.

SKINVIVE BY JUVEDERM

Skinvive is the first and only hyaluronic acid microdroplet injectable. This modified hyaluronic acid gel is injected into the dermis, improving cheek smoothness and increasing moisture and softness. Skinvive is perfect if you're looking for glowing, hydrated, and healthy skin without adding volume.

\$650

Chemical Peels

At Swan Aesthetics, we offer our clients our two favorite chemical peels from the Reve Peel line, each with distinct benefits for your skin. Targeting various skin conditions such as acne, dullness, redness, sun damage, fine lines, and hyperpigmentation..

BIOREPEEL

The BioRePeel presents a modern approach to chemical peels, featuring a unique biostimulating and revitalizing formula suitable for various regions such as the face, neck, décolletage, and intimate areas. This treatment effectively addresses concerns including dullness, sagging skin, acne, pigmentation issues, fine lines, and signs of photoaging.

\$275

ALLERGAN SKINMEDICA® PEELS

Allergan SkinMedica® Peels are designed to treat every type of skin concern, from light scars or acne to deep-set wrinkles. Choose from three different peels, the Illuminize®, Vitalize®, and Rejuvanize®, depending on your specific aesthetic goals.

The Illuminize® is the lightest peel. It's perfect for small blemishes or overall brightening. The Vitalize® and Rejuvanize® go both deeper to address fine lines and wrinkles, and the Vitalize® can help address pigmentation issues as well.

The Rejuvanize® is the deepest peel, and is specifically formulated for deep peeling and dramatic results. Your Swan provider can help you pick the peel best-suited for your skin.

Laser Services

At Swan Aesthetics, we offer laser services that can target a wide variety of aesthetic issues, working to rejuvenate your skin and give you a youthful, refreshed appearance. From our signature laser facials to laser hair removal, our laser services can do almost anything for you

LASER FACIAL

The Laser Genesis facial offered by Swan Aesthetics is a non-invasive cosmetic treatment utilizing targeted light to apply gentle heat to the skin. This enhances the skin's appearance by promoting collagen production and the generation of new skin cells.

Laser facials are beneficial for addressing concerns such as wrinkles, acne scars, and dullness. Additionally, it can help alleviate redness and rosacea. The generated heat from these lasers gives our client the added benefit of new collagen production, contributing to enhanced skin elasticity and firmness.

Experience the transformative power of our Laser Genesis Facial at Swan Aesthetics for a radiant, youthful appearance you'll love. Embrace confidence in your skin with our luxurious Signature Laser Facial, featuring a comprehensive regimen of cleansing, gentle exfoliation, application of advanced treatment serums, and a rejuvenating effleurage and lymphatic drainage massage.

Priced competitively, our Signature Laser Facial provides an affordable pathway to achieve radiant, rejuvenated skin. For optimal results, we recommend scheduling this service monthly or investing in a package to maximize the benefits of regular treatments.

\$375

EXCEL V+ LASER SERVICES

This non-invasive procedure is suitable for all skin types, ensuring minimal downtime. Utilizing dual wavelengths of light, Excel V+ is one of the most versatile aesthetic treatments available.

It can treat an extensive range of concerns, including sunspots, melasma, freckles, wrinkles, diffuse redness, skin texture and quality, pore size, acne scars, surgical scars, spider veins, reticular veins, cherry angiomas, spider angiomas, surgical bruising, injectable bruising, active acne, skin tags, and hair removal.

Thanks to its efficacy and precision, Excel V+ empowers patients to achieve smoother and clearer skin with fewer treatments compared to traditional methods. Embrace the advanced technology and experience the revitalizing effects of Excel V+ for radiant and healthier-looking skin.

\$250+

SkinPen Microneedling —

SkinPen Microneedling is a procedure that induces minor injuries to activate the body's healing response. SkinPen is the only FDA-approved microneedling device that is indicated to treat wrinkles in the neck area and acne scars. It's the best microneedling product for skin rejuvenation right now, and that's why we use it at Swan Aesthetics.

It works by boosting blood circulation to the skin and promoting the generation of new collagen, which contributes to skin firmness and effectively addresses lines and wrinkles over the course of several treatments.

SkinPen microneedling also helps minimize the visibility of scars, stretch marks, some hyperpigmentation, and various surface blemishes. It's performed on the face, neck, and thighs.

Microneedling stimulates cell turnover, contributing to a more youthful complexion. Additionally, it enhances the overall texture and tone of the skin. Depending on the severity of the concern, the best results are achieved when treatment is done in packages of three or more.

SkinPen microneedling can be combined with chemical peels, PRF, and medical grade serums to amplify your treatment results.

\$350+

PRF Injections

Platelet-rich fibrin (PRF) therapy is a natural avenue for fostering the growth and regeneration of hair and skin cells. We use plasma derived from your own blood, ensuring a wholly natural approach. A small blood sample is drawn from your arm and processed to obtain platelet-rich fibrin (PRF).

The plasma contains platelets housing growth factors that kick start the repair and regeneration of skin tissue, while also stimulating the production of new collagen and elastin. This transformative process significantly improves skin health, promoting firmness, tightness, and an overall youthful appearance. PRF injections can also promote hair growth when injected into areas experiencing balding.

For a comprehensive skincare approach, PRF treatment can be seamlessly combined with other procedures such as microneedling and dermal fillers, providing a holistic solution to address various skincare needs.

\$375+

DiamondGlow

The DiamondGlow facial rejuvenates the skin with a special diamond tip and unique suction technology. This dual approach efficiently removes dead skin cells while delivering customized serums tailored to your skin's needs.

With benefits for everyone, the DiamondGlow Facial addresses fine lines, wrinkles, dark spots, hyperpigmentation, and acne-prone skin. It's suitable for all skin types and individuals.
